

Bi-folding &
Slide & Swing Doors

Chatsworth Windows
Welcome

“I would just like to add that following a really bad experience with Everest a few years ago I was a little nervous about going through the process again. However, there was absolutely no comparison to the Everest experience. The two fitters did a fantastic job, were sociable and polite and are a credit to your company. We are thrilled with our Bi-folding Doors! I would be obliged if you would pass my thanks on and give them a pat on the back from yourselves. Credit where credit is due.”

Unrivalled quality, service and reliability

Chatsworth Windows are the largest manufacturer in the area by manufacturing our own products we maintain total control over quality and efficiency.

All installations are fitted with attention to detail and pride in the finished article. Every installation has a qualified surveyor on site.

Every consumer will receive Free Deposit Protection, Free Stage Payment Protection and a Free Insurance Backed Guarantee for complete peace of mind.

We have a great range of finance options, like buy now and pay later available on our full range of products. For more information contact us and we will be happy to help.

Bi-folding doors

Imagine the difference bi-folding doors could make

Bringing the outside inside

Bringing together internal and external environments has been a trend that has seen the development of a wide range of products that enable the opening of large expanses of a building. Our range of bi-folding doors allow homeowners to engage with their environments.

However, it is also essential that these products perform to the standards expected and deliver comfortable living and working environments.

The flexibility that these innovative systems offer in combining indoor and outdoor life enables building you to live your lives the way you choose.

Our systems combine the strength and lightweight properties of aluminium with form and function of the highest standard. Reliability and security are key drivers in the design of any sliding or folding door system. Our doors have been rigorously tried and tested to exceed many standards and are certified under the 'Secured by Design' scheme for security and exceed severe exposure categories for weather tightness.

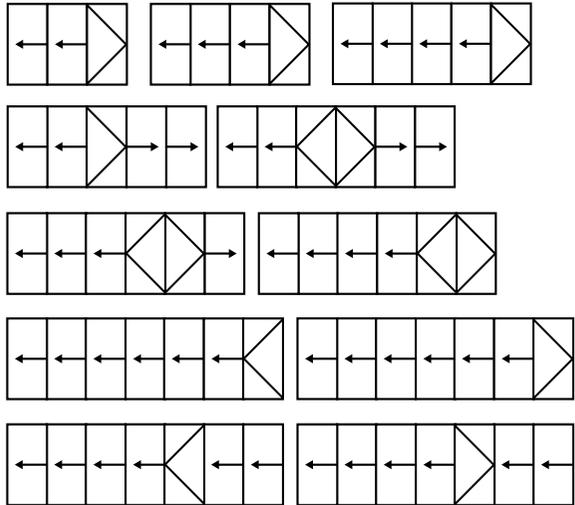

“Expand your living space by bringing the outside in”

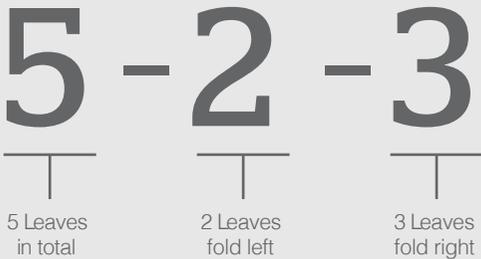

Configurations

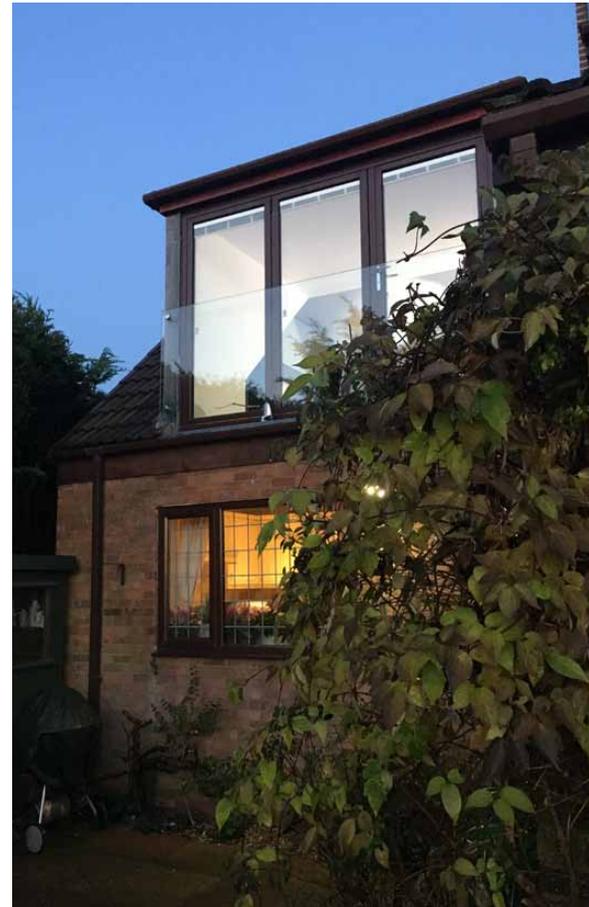

Versatile and flexible, our market leading aluminium bi-folding door system is available in a wide range of configurations to create the look you desire.

Multiple doors can be combined with open-in or open-out options, in a variety of styles to create a wide expanse of opening. The narrow profile ensures that maximum glazing is achieved, flooding rooms with light.

How configurations work

Built for your home

Complete flexibility to suit your needs

Our bi-fold doors have been designed to provide you with the flexibility to create the perfect look that will complement your home and your lifestyle.

- Wide range of configuration options
- High performance glazing and design
- Minimal profiles for a modern look
- Complete range of handles and accessories
- Unique flush line pop-out handle option
- Full range of standard and bespoke colours
- Dual colour option for inside and out
- Tested to PAS 24 for enhanced security and SBD
- Sturdy and reliable sliding mechanism
- Low threshold option for room dividers
- High performance as standard
- Can easily be combined with all aluminium window and door systems
- Also available in a corner configuration

“Get the design and performance you want with the style you deserve”

Exclusive to Chatsworth Windows

Slide & Swing Doors

See more of the world with Slide & Swing doors

New-generation multi-pane door

The Slide & Swing Door is a contemporary, new-generation multi-pane door that enables homeowners to maximise their living space. This new door transforms ordinary rooms, opening up spaces between rooms or between the home and the conservatory or garden in a way no other 'patio' door can do.

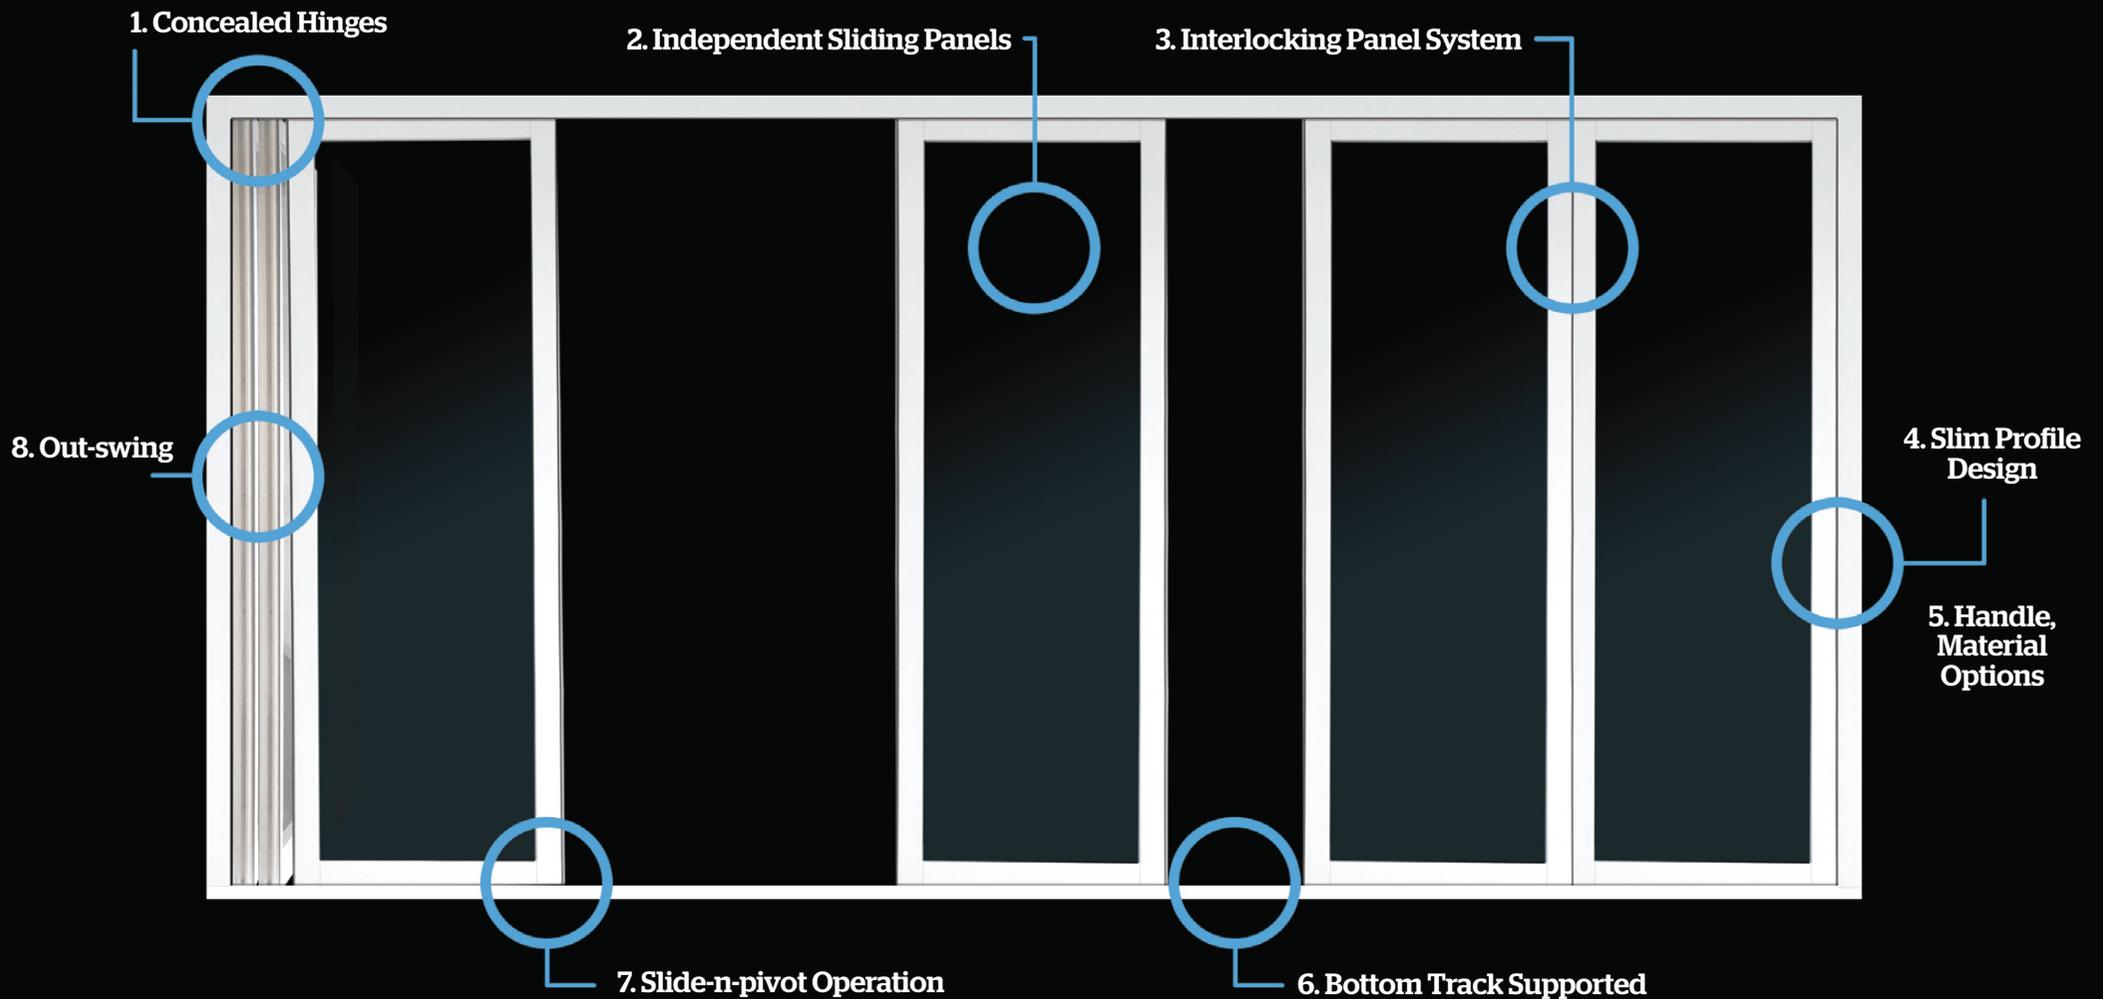

Unlike Bi-folds, the Slide & Swing doesn't encroach on internal living room or patio space when opening or closing. And homeowners can open any part of the door for ventilation or access. It even operates as a partition.

When closed, the doors interlock together creating a solid wall that is secure, and more secure than a traditional Bi-fold

Watch our slide & swing door demonstration video, simply scan the QR code with your smart phone or tablet.

1. CONCEALED HINGES

All hinges/pivot points are concealed for more pleasing aesthetics and architectural sight-lines.

2. INDEPENDENT SLIDING PANELS

No hinges, no binding, no sagging. Panoramic door panels glide with a smooth and easy functionality along the bottom track.

3. INTERLOCKING PANEL SYSTEM

Interlocking “tongue and groove” panels provide for security and performance against the elements.....without the need for additional locking mechanisms.

4. SLIM PROFILE DESIGN

Designed to maximize the glazing area and improve the visual impact of the doors, the profiles used are some of the slimmest available in the window and door market.

5. HANDLE, MATERIAL OPTIONS

Choose from a wide variety of handles and material finishes. Including PVC, aluminium, timber and combinations of both.

6. BOTTOM TRACK SUPPORTED

Utilizing our low up-stand track, this system is designed with the load of the panels being directly supported by the bottom track and not the lintel.

7. SLIDE-N-PIVOT OPERATION

Utilizing our innovative, patented Magnaline® hardware system, the door panels slide-n-pivot independently for a fuller, clear opening.

8. OUT-SWING

The system is specifically designed to maximize the living and patio space in your home.

Swing & Slide door benefits

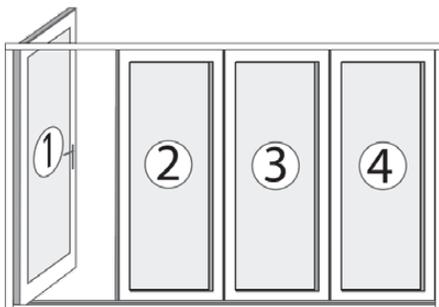

They open rooms up to the outside. One of the most popular features of the aluminium Slide and Swing Door is its seamless ability to open up rooms to the outside. In seconds large Slide and Swing doors can be easily folded back, and create an open space in any property, making them perfect additions to any extension.

Highly thermal efficient. Using standard glazing a 1.6 – 1.7 U-Value can be attained, which is a great standard of thermal efficiency, however, our customers can also order triple glazing or a higher standard of double glazing that can be used to get the U-Value down to 1.4.

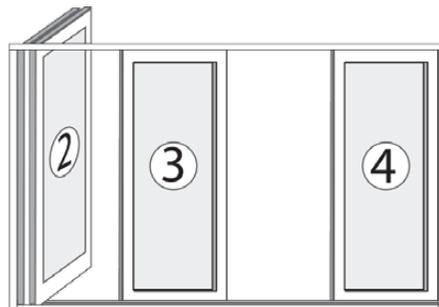

Add value to your home. Having a large opening at the rear of a property that lets a vast amount of light in and can be fully opened is a fantastic addition to any property. Aluminium Slide and Swing Doors are becoming increasingly popular additions to renovations and new builds, as they help to increase the value of a property, with their combination of modern day aesthetics and open space features.

Wide range of colours. With a vast range of colours available for our Slide and Swing Doors, not only can you choose your perfect colour, but you have the peace of mind in the colour lasting over time. There is also an option to go for a genuine timber finish on the interior side of the doors.

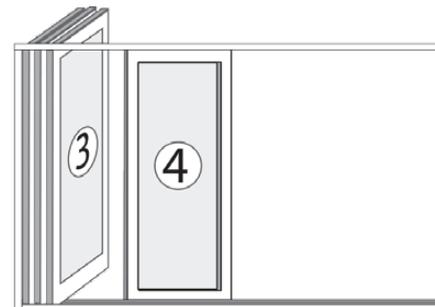

How the slide & swing door system operates

Step 1: Open access door
Turn handle to open the access door.

Step 2: Slide panel and pivot to open
Slide the next panel over toward the open access door. When in position, the sliding panel will click into place and pivot open

Step 3: Continue with remaining panels
Continue the same process with the remaining panels.

“Let the light flood in to your home, whilst keeping the weather out”

A local company with a national, award winning reputation for quality right across the board.
