Door Surrounds

Victorian Winged

We have developed a unique design enabling the winged ends of the surround to be extended to suit your application. This allows you the flexibility to order this beautiful surround to fit your own door width. Brighten up your garage with this version of our great looking surround in the Victorian Style.

Finish Options: Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

* Lead look top optional

Victorian Portico Surround

A simple Victorian surround that has an elegant design to compliment a front door and side panel.

Recommended for door openings between 1920mm (max) x 1700mm (min). For best results pillars can easily be trimmed off at the top to adjust the height.

Finish Options: Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

* Lead look top optional

Victorian

Beautifully moulded from rigid GRP, and incorporating a rose design centre piece in the overdoor canopy, this maintenance free door surround will give years of service. Fast, easy installation means that you can have an entranceway that stands out from the crowd, in minimal time.

Finish Options: Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

* Lead look top optional

Edwardian

A modern surround in a satin finish. The top can be made up to a maximum size of 3140mm overall.

Pillars are also available separately.

Finish Options: Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

* Lead look top optional

* Shown with lead look top.

Georgian

A beautiful surround, the Georgian features are sharp and clear cut. Pillars available at 2100mm, 2300mm & 3000mm high.

Finish Options: Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

Victorian Portico Canopy

A portico is a functional yet stylish way to add a touch of class to the front of your home by transforming the appearance of your doorway.

Our porticos are available in a range of sizes, with the standard options being 2000mm, 2500mm and 3000mm wide. See the specifications sheet for more information on sizes and options available on your portico design.

Projection 1100 at top, 1000 at bottom.

* Half fluted pillars also available

Quality GRP Bow Canopy

A bow window canopy is the fast and easy way of transforming a flat window in to a more attractive and spacious bow window. Manufactured in strong rigid GRP. Cuts fitting time to a minimum and can be completed by an installer, eliminating lead work and plaster ceilings etc. No need for specialist contractors to finish the job.

Finish Options:

Available in three shades of white, chocolate brown, light oak, rosewood or anthracite grey.

Standard Sizes Available:

Available to fit openings between 1500 - 3400mm.

Bespoke custom made segmented canopies also available on request.

Suggested Opening Sizes

Optional GRP simulated lead flashing.

New Lead Look GRP Flashing Available

Fig. 1

Columns

Transform any entrance with our round or half round columns.

These beautifully moulded columns are lightweight and easy to handle. They can be used in many building projects, including porches and porticos.

Further strength for load bearing properties can be added by filling the centre of the columns with steel rods and concrete, creating a real feel concrete column that will retain its elegant looks with no maintenance. Columns can be used with our canopies, or as part of your own design.

Both columns are also available in Half-Round profile.

Why Choose Columns?

- Beautiful Moulded Design
- Fast & Easy Installation
- Made in Strong Rigid Fibreglass
- Delivery Approx' 3-4 Weeks
- Totally Maintenance Free
- Fully Guaranteed

Finish Options:

White, brown, light oak, rosewood or anthracite grey.

Concept Canopy

Concept canopy will make a huge difference to your home, whether you chose a carport, a covered walkway, a children's play area or a stylish patio canopy. Made from tough and maintenance free fibreglass reinforced plastic, your canopy will look fresh and modern for years to come. The translucent 2.4mm thick roof sheets are strong and durable but still allow natural daylight.

Adds value to your property...

The Concept canopy has undergone rigorous testing procedures in simulated and actual installations over many years. Monitoring of test models is continuous and no component has ever been detected. Concept canopy requires no ground preparation and, in most cases, planning permission is not necessary. It immediately becomes a welcome addition to any house or bungalow.

Installation...

The canopy installation can be carried out by trained installers in just a few hours (fixings supplied) with no fuss or mess. All you need to maintain the elegant looks is an occasional wipe clean. Concept Canopy is designed on a modular basis, meaning you can increase the area of coverage at any time with no support pillars, still providing maximum projection.

*Standard size 2440 projection. Available in reduced sizes.

Flexi-Roof Modules

Ideal for porches, extensions & canopies.

Constructed from glass reinforced plastic. Each roof is made to your exact requirements. Max size to the outside of the fixing timber (see diagram below) 6200 x 3200mm.

Cut-outs can be built in, as well as blank ends to allow the module to fit against side walls.

Manufactured to fit your external frame sizes, we work out the overhang to suit. Simply lift the roof on top of the frames and screw up into the fixing timber around the outer frame layout.

All flexi roofs are manufactured with built in insulation and fitted electrical conduit, making light fitting easy and ensuring your home retains warmth.

* Also available in the following fascias.

Warwick Fascia

Lincoln Fascia

Double Flat Fascia

GRP Dormers

GRP (glass reinforced plastic) has become one of the most popular methods of manufacture for dormers.

Here at APC, we are the only company that manufactures bespoke dormer modules without the use expensive moulds. We have developed a new system of manufacturing that has been proven to exceed building specifications and passed rigorous independent testing from the CGFMA.

Almost any size dormer can be manufactured using our method. Once assembled, our units can be cladded inside, and out, with fibre re-enforced polymer resin (FRP) to provide strength and weather protection. The FRP skirt of our dormers are reinforced to aid fixing to the roof trusses and to support roofing lathes and tiles. Our dormers are fully insulated, constructed using PU foam to give a U value around 0.184.

All our products are covered by our 10-year warranty.

Information on CGFMA testing can be requested.

Variable size.

GRP Chimney including real brick slips.

Our GRP Chimneys are designed to provide the developer with a detail that meets local planning requirements, without resorting to the cost of building a brick stack from ground floor to roof level. GRP chimneys also offer the home buyer the benefit of increased floor area, where a traditional chimney breast would usually encroach into a room. Chimneys can be manufactured to suit any roof pitches and may be positioned in most places. Any reasonable number of pots may be added, in a range of colours.

All units incorporate lifting eyes to allow for lifting into position with a crane. Please contact our sales department with details of your requirements.

LONGITUDINAL MID RIDGE DOUBLE POT CHIMNEY

END RIDGE SINGLE POT CHIMNEY 35 deg

GRP Brackets and Corbels

BRP 2

A popular injection moulded decorative bracket with a smooth silk finish for corbelling or contemporary use around buildings.
